Miscellaneous Comments/Remarks

Oath/Declaration

1. The substitute Oath/Declaration filed on July 11, 2007 has been accepted and made of record.

Information Disclosure Statement

2. The information disclosure statement (IDS) submitted on July 9, 2007 has been considered by the examiner.
3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The relevance of the references cited to Hsiao et al (US Pre-Grant Publication 2002/0030928) and Japanese Patent JP 2000-11323, referred to hereinafter as JP'323 will now be briefly discussed.

While Hsiao et al and JP'323 do teach some of the features of the claimed invention, there are certain features that they do not.

Hsiao does not specifically teach depositing a conductive layer and then subsequently, depositing a photoresist layer on the conductive layer (as required in each of the independent Claims 1, 2 and 18).

JP'323 does mention a grain size of conductive material, but does not teach that the conductive material is filled into at least one channel. Thus, JP'323 cannot meet the limitations of filling the at least one channel with a conductive material to define at least one of a coil structure and a pole tip structure (as required in each of Claims 1, 2 and 18).
